

Evaluation Subcommittee  
11/08/06

Present: Drs. Melanie Hagen, Lynn Romrell, Kyle Rarey, Donna Duckworth, Students: Emily Goldberg, Kavita Rajasekhar.

The following clerkships were discussed during the meeting:

Family Medicine received good scores this time.

Medicine was atypical of the set guidelines. The orientation of the syllabus was a bit confusing for some. The student performance component was in the wrong place. It was suggested that some of the forms may need to be changed. It was suggested that Dr. Harrell be invited to sit with the committee.

Neurology needs to be reorganized in order to match the set guidelines. The student feedback section will be changed as far as the criteria of feedback. It is the director's responsibility to give the students feedback. There was a good comparison between Jacksonville and Gainesville.

Ob/gyn received very good scores overall. The criteria in the Jacksonville and Gainesville campuses are the same. There was good description in the written report about feedback.

At the next meeting Anesthesiology, Emergency Medicine, Pediatrics, Psychiatry, and Surgery will be discussed.

The meeting adjourned at 1:00 pm.

The Next meeting will be December 13, 2006
