

GMS 6495: Seminar in Physiology, Fall 2008
Room R5-265, ARB, Mondays at 4:00 p.m.

Coordinator: Debbie Scheuer, Ph.D.
scheuerd@ufl.edu

Date	Speaker
Sept. 9 (Tuesday) in R2-265 "Neuroendocrinology of fetal stress and parturition" (please note day and room change for this seminar)	Dr. Charlie Wood
Sept. 15 Brazil "Novel aspects of Ang 1-7/Mas"	Dr. Robson Santos
Sept 22 Department of Zoology "Secrets from the deep: what marine biologists know about the hottest new signaling molecule"	Dr. David Julian
Sept. 29 (topic TBA)	Dr. Mohan Raizada
Oct. 6 Department of Wildlife Biology and Conservation "Effects of environmentally relevant methylmercury exposure on reproduction in White Ibises: unexpected effects at unexpected doses"	Dr. Peter Frederick
Oct. 13 Department of Pharmacodynamics "Melanocortins"	Dr. Carrie Haskell-Luevano
Oct. 20 College of Dentistry Pain Center "Do we feel more pain as we age? An experimental approach to evaluating the effects of age on pain sensitivity"	Dr. Robert Yeziarski
Oct. 27 Department of Pharmacodynamics "Regulation of aqueous humor dynamics"	Dr. Dorette Ellis

Nov 3

Dr. Randy Braith

Department of Applied Physiology and Kinesiology
"Effects of EECP (enhanced external counter pulsation) in patients with refractory angina"

Nov 10

Dr. Paul Davenport

Department of Physiological Sciences
"Neural mechanisms of respiratory sensation"

Nov 17

Dr. Tom Clanton

Department of Applied Physiology and Kinesiology
"Reactive oxygen formation in skeletal muscle: possible roles in acute adaptation to local stress"

Nov 24 (Thanksgiving week)

Dr. Linda Hayward

Department of Physiological Sciences
(topic TBA)

Dec 1

Dr. Colin Sumners

"Regulatory proteins in the PVN: role in cardiovascular homeostasis and hypertension"

Dec 8

Dr. Jeffrey A. Kleim

Department of Neuroscience
"Cortical plasticity and recovery from stroke"

(revised September 4, 2008)
