Request for investigators to designate IDC returns to the UF Shands Cancer Center

MEMORANDUM

February 19, 2007

To: UF Shands Cancer Center Membership
From: W. Stratford May, Jr., M.D., Ph.D.
Director
Subject: IDC return to UFSCC

Dear UFSCC Member,

The UFSCC has made significant investments in research facilities and resources in order to support the membership. We are now developing plans to sustain these facilities and better align center resources to best support center research endeavors. To support these efforts going forward, we are now requesting that investigators designate a portion of the 7.5% center/institute IDC return on their grants to the UFSCC. These funds will be used to maintain research equipment and cores established at the UFSCC. As of 3/01/07, we request that members with labs in the Cancer and Genetics Research Complex designate at least 50% of the 7.5% (3.75%) to the UFSCC. All other investigators are requested to designate at least 2.5% (33% of the 7.5%) to the UFSCC. Those members that achieve these targets will be afforded priority status, including supplements to offset the costs, for the use of UFSCC cores.

Together, we can create an even better environment for cancer research at UF.
